PRIMARY EXAMINER**

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-7,9-12,14-37,39,41-42 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The above claims are allowable because the prior art of record fails to disclose or suggest, in combination with the other claim limitations; a micromechanical element, including setting to the active state with a sum of the first control signal and the second control signal, and further the means for feeding the sum of the first control signal and the second control signal with a raised voltage level to the micromechanical element, wherein at least one control electrode is at least partly covered by a dielectric layer to prevent galvanic contact between the electrodes and the micromechanical element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

3. Applicant's arguments, see Amendment, filed 7/18/2005, with respect to the above claims have been fully considered and are persuasive. The rejections/objections of these have been withdrawn.

### ***Conclusion***
